

SoThin Thin Client™...

... turns a PC into an intelligent Thin Client device quickly and cost effectively.

This ensures a seamless migration into the Thin environment. The net effect is a practical and cost saving solution for your IT Department.

This simple application converts a Microsoft® Windows PC into a Thin Client providing the security and management benefits of SoThin Thin Client Computing.

Enabling users to work directly on your company's servers, it centralises administration, improves workflow and at the same time preserves the capital investment in your organisation's personal computers.

SoThin Thin Client Computing also means reduced downtime caused by malicious software, like viruses, worms and Trojans.

Best suited for financial and corporate environments, professional services, healthcare and education, transport and logistics, call centres and support, front and back offices on any organisations

FEATURES

- ▶ Display either a standard Windows Desktop, or turn the desktop PC into a Thin Client Terminal with full Multimedia support.
- ▶ Software connection support for Citrix® ICA, Microsoft® RDP, Tarantella®, SoThin Load Balancing™ and Real VNC.
- ▶ Hardware vendor independent.
- ▶ Quick, remote deployment to thousands of desktops.
- ▶ Prevent unauthorized access to local and network drives.
- ▶ Support for all Microsoft® 32bit platforms.
- ▶ Grant access to Linux, UNIX, Sun and Microsoft® Windows Server systems from one desktop.
- ▶ Full Microsoft Internet Explorer and third-party web browser support.
- ▶ Microsoft® Windows Active Directory Support.
- ▶ Support for local printers and devices.

BENEFITS

- ▶ Decreases TCO on hardware.
- ▶ Conversion between Thin Client and the Microsoft® Windows Desktop is easily managed.
- ▶ Prevents users from making unauthorised configuration changes or install software.
- ▶ Helps prevent the spread of malicious software and viruses.
- ▶ Prevents data theft or loss, as no data is stored on the client device.
- ▶ Reduces demand on IT resources.
- ▶ Prolongs life span of older hardware.
- ▶ Improves employees' workflow.
- ▶ Stops users from copying company data to USB Drives, CD-ROMs or Floppy disks.
- ▶ Provides access to the internet or web based applications.
- ▶ Presents the user with a clear, logical, easy to use interface.
